NAAZMEEN

Hyderabad, Telangana | 9059869051 | naazmeensyed313@gmail.com | Github | Linkedin

EDUCATION

B.E., Computer Science & Engineering — *Stanley College of Engineering and Technology for Women* **CGPA: 9.11 / 10**

Intermediate (MPC) — *Vashista Junior College* **95.9%**

SSC — *Vasavi High School* **98%**

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, SQL

Web & Frameworks: React, HTML, CSS, Tailwind CSS, Flask, Streamlit

AI / GenAI: Gemini API, OpenAI API, Generative AI, Prompt Engineering

Databases: SQLite, MongoDB

Tools & Platforms: Git, GitHub, VS Code

PROJECTS

CodeVerse AI — AI-Powered Learning Platform | *Python, Flask, Gemini AI, JS/Three.js, Tailwind, SQLite* *[GitHub | Live Demo]*

- Built an AI-powered CS learning platform featuring interactive algorithm visualizations, memory/CPU simulations, and a live SQL playground.
- Integrated the Google Gemini API to provide real-time, context-aware tutoring and dynamic learning insights.

FindOra — Smart College Lost & Found Portal | *Python, Streamlit, SQLite, Pandas, SHA256 Hashing* *[GitHub | Live Demo]*

- Developed a lost-and-found management portal with secure user authentication and a custom smart-matching algorithm that pairs lost and found reports by category, color, location, and description.
- Built an analytics dashboard using Pandas and a secure, end-to-end item recovery workflow with automated notifications.

Nexora — AI-Powered Startup Idea Analyzer | *JavaScript, HTML5, CSS3* *[GitHub | Live Demo]*

- Created an interactive web tool that evaluates startup ideas and visualizes feasibility, market demand, and risk through dynamic charts and UI components.
- Designed a responsive, modern interface presenting strengths, risks, and actionable go-to-market insights.

FocusFlow — Virtual Study Room | *Python, CustomTkinter, JSON* *[GitHub | Live Demo]*

- Built a desktop productivity app with an integrated focus timer, task manager, notes system, and streak tracker.
- Designed a modular, dark-themed UI and implemented persistent local data storage using JSON.

INTERNSHIP EXPERIENCE

Artificial Intelligence & Cyber Security Intern — *Indian Servers Pvt. Ltd. (Remote)* Apr 2026 – Jun 2026

- Gained hands-on exposure to AI, machine learning fundamentals, cybersecurity concepts, and automation through structured, project-based learning.

Java Programming Intern — *InternPe (Remote)* Apr 2026 – May 2026

- Developed Java-based applications, applying core object-oriented programming concepts and problem-solving techniques.

Python Programming Intern — *SyntexcHub (Remote)* Feb 2026 – Mar 2026

- Worked on Python programming exercises focused on problem-solving, logic-building, and applied scripting.

Software Development Intern — *Cognifyz Technologies (Remote)* Oct 2025 – Nov 2025

- Built Java mini-projects, applying object-oriented design principles in a collaborative development setting.

HACKATHONS, ACTIVITIES & ACHIEVEMENTS

- AMD Developer Hackathon: ACT II (Track 2 – Video Captioning)
- ET AI Hackathon 2.0 — The Economic Times.
- Google Solution Challenge 2026: Build with AI.
- GenAI Forge Hackathon 2026 — presented an AI-powered solution for farmers.
- CODECRAZE – Where Ideas Come to Life (Hackathon).
- Winnovx Hackathon
- Python Project EXPO
- 5-Day AI Agents: Intensive Vibe Coding Course.
- Secured 3rd Rank in the AI-thon Competition.| Won the Top Prompt Generator Award at Google Student Ambassador Program.

CERTIFICATIONS

- Oracle Cloud Infrastructure Foundations Associate — Oracle
- Microsoft Azure AI Essentials — Microsoft & LinkedIn
- Career Essentials in Generative AI — Microsoft & LinkedIn
- Career Essentials in GitHub Copilot Professional Certificate — GitHub
- Share Data Using Google Data Cloud — Google Cloud
- Introduction to Generative AI — IBM SkillsBuild
- TCS iON Career Edge — Young Professional
